EDUCATION

- **Indian Institute of Information Technology, Bhagalpur** 2023 – 2027
B.Tech, Electronics and Communication Engineering CGPA: 7.84
- **Mithila Public School, Forbesganj – Senior Secondary (Class XII)** 2021
Central Board of Secondary Education (CBSE) Percentage: 88.6%
- **Sanskar Bharti Global School, Phulparas – Secondary (Class X)** 2019
Central Board of Secondary Education (CBSE) Percentage: 83.6%

TECHNICAL SKILLS AND INTERESTS

Languages: C, C++, Python, JavaScript, TypeScript, HTML5, CSS3
Developer Tools: Git, GitHub, Docker, VS Code, npm
Frameworks: Node.js, Express.js, React, Next.js, Tailwind CSS, Socket.io, Mongoose
Cloud / Databases: AWS (EC2, S3), MongoDB, MongoDB Atlas, MySQL
Concepts: REST APIs, Microservices, CI/CD, OOP, Data Structures & Algorithms, Distributed Systems
Areas of Interest: Backend Engineering, Full-Stack Web Development, Machine Learning, Cloud Computing

INTERNSHIP

- **Suvidha Foundation (Suvidha Mahila Mandal)** Sept 2025 – Oct 2025
Machine Learning Intern Work from Home
 - Built and trained a text classification model using Python and scikit-learn achieving ~85% accuracy on a 5,000-sample dataset to support the NGO's content moderation workflows.
 - Developed data preprocessing pipeline (tokenisation, TF-IDF vectorisation) reducing model training time by 30%; documented findings and presented results to the program coordinator.

PROJECTS

- **DevBridge: Developer Networking Platform** 2024 – 2025
Scalable full-stack platform with real-time chat, JWT auth, and swipe-based developer matching github.com/eager-31/devbridge
 - **Tools & Technologies:** React, Node.js, Express.js, MongoDB, Socket.io, JWT, TypeScript, Tailwind CSS, Zustand, Docker
 - Designed and deployed a **scalable** REST API with Express.js and TypeScript handling **200+ concurrent connections**; implemented bidirectional real-time communication via Socket.io with **sub-100ms** message latency.
 - Enforced stateless JWT-based authentication with refresh-token rotation; containerised the application using **Docker** for consistent deployment across environments following **CI/CD** principles with GitHub Actions.
 - Managed global client state using Zustand; designed responsive UI across 10+ reusable components, improving page load performance by **35%** through code splitting and lazy loading.
- **GlobalAuction: Real-Time Bidding Platform** 2024 – 2025
Fault-tolerant auction platform with distributed live leaderboard and secure RESTful API github.com/eager-31/globalauction
 - **Tools & Technologies:** Node.js, Express.js, MongoDB, Mongoose, JWT, Vanilla JavaScript, HTML5, CSS3
 - Architected a **fault-tolerant, distributed** live bid leaderboard serving **500+ simultaneous bid events** with instant updates; maintained top-5 unique bidder rankings with **zero data inconsistency** under concurrent writes.
 - Implemented **seller-protection business logic** on both client and server preventing auction manipulation; deployed on **AWS EC2** with MongoDB Atlas using **agile** development and Git-based version control workflows.

ACHIEVEMENTS

- **Problem Solver (300+ DSA Problems)**, LeetCode (200 Medium, 40 Hard), Codeforces, CodeChef, GeeksforGeeks
- **Open Source Contributor**, Active GitHub contributor – 2 public repositories with 100+ commits (DevBridge, GlobalAuction)
- **Certificate of Participation**, TVS Credit E.P.I.C 7.0 – IT Challenge (Round 1 Assessment) Sept 2025
